Workstations

Power-Assisted Liposuction

► Fatigue-free working with optimized workflows

Workstation

The combination consisting of the medical products *Vacusat® power* with one of our infiltration pumps *Liposat® Pro* or *Pro plus* and the power-assisted liposuction device *Vibrasat® Pro* offers an ideal complete solution for body contouring.

All components are perfectly compatible and harmonised to each other, guaranteeing excellent efficiency, environmentally friendly operation and a maximum in safety for your patient.

All available safety features and accessories included (Overflow protection, hydrophobic filter, attachment kits, 3-pedal footswitch).

Two options

Workstation Pro

Consisting of *Vibrasat® Pro*, *Liposat® Pro*, *Vacusat® power*, *Thermia Pro* mounted.

Workstation Pro plus

Consisting of *Vibrasat® Pro*, *Liposat® Pro plus*, *Vacusat® power*, *Thermia Pro* mounted.

| REF 00004272

Vibrasat®

Vibrating handle

▶ tissue-friendly technology

Vibrasat® Pro

Our *Vibrasat® Pro* is the leading technology for vibration-assisted liposuctions. It eliminates fatigue for the doctor even during the longest procedures - while its technology maximizes patient results.

The liposuction handle offers you the smoothest and most gentle way to remove fat. Its anatomically shaped hand grip carries just the right balance point with a low weight, allowing the doctor to hold it comfortably for any length of time.

Less effort is required to move the cannula through the tissue, ensuring a lower risk with maximum precision results.

Combination of Wand and Console

Liposat®

Infiltration pumps

► Care for viable fat cells with our garant for the gentle handling of fat

Liposat® Pro plus

Because we care about viable fat cells. Experience a revolutionary way to handle fat. Optimize your workflow with efficiency, safety and comfort with the new *Liposat® Pro plus*, specially designed for lipotransfer.

The influence of this pump and its tube set on the viability of the fat cells is reduced to a minimum. According to an in-house in-vitro study, *Liposat® Pro plus* achieves a 92 % or more survival rate for infiltrated fat cells.

The versatile two-in-one pump is developed for both TLA and fat infiltration. *Liposat® Pro plus* also takes care of the volume management, so you can focus exclusively on your patient.

Liposat® Pro plus

with a 1-Pedal Footswitch.
